

RESEARCH NOTE 012 · SYNTHETIC DEMONSTRATION

Route B deserves a closer look.

A worked example of descriptive analysis. Eighteen synthetic observations; no real transit performance claim.

Mean wait, in minutes

WHAT THE DATA SAYS

Route B averages 8 minutes, compared with 5 on A and 4 on C. Each route has six observations in the included CSV.

WHAT IT DOES NOT SAY

These invented observations do not establish a service trend or statistical significance. Time of day and arrival behavior are not modeled.

Method

Arithmetic mean by route. No missing values or exclusions. Period: 14-18 September 2026. Reproduce from data/wait-times.csv; units and limitations are in data/dictionary.txt.
