

03

Read a rate

A short workbook on denominators and fair comparisons.

25 minutes

You need paper or a spreadsheet. Start here. Open the answer after trying the task.

LESSON GOAL

Compare groups of different sizes.

A count says how many. A rate says what fraction of the group. Keep the event and time period the same when you compare.

Workshop	Attended	Completed
Morning	40	30
Evening	25	20

Practice with the two workshops

1. Divide completed by attended for each workshop.

Morning: _____ % Evening: _____ %

2. Which had more completions? Which had the higher rate?

3. Write one sentence that includes both count and rate.

Check your work with lesson-03-answer.pdf. Ask questions in your course forum.
