

A place to grow.

Community garden report / April - September 2026

FICTIONAL ORGANIZATION. ALL RESULTS BELOW ARE SAMPLE DATA.

24

garden sessions

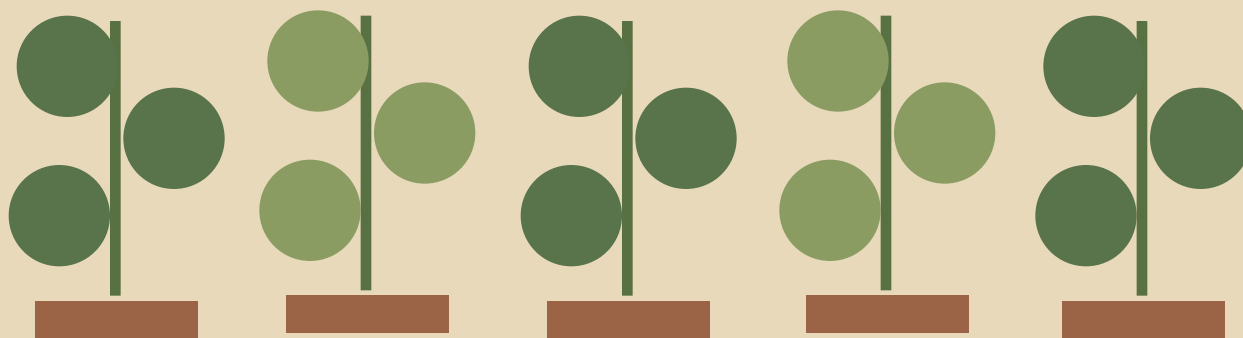

68

unique volunteers

312 kg

produce shared

Six months in the garden

We opened the garden on Saturdays through the growing season. Volunteers sowed, watered and harvested together. This sample report shows how a small nonprofit can explain its work and share the figures behind it.

What the numbers mean

These invented figures demonstrate reporting structure.

24 garden sessions

Four sessions each month from April through September. A session counts once, regardless of attendance. Cancelled sessions would not count.

68 unique volunteers

Distinct people across the whole season, counted once each. Monthly attendance cannot be added to get this total. No personal volunteer records are included in the public sample.

312 kg of produce shared

The sum of sample harvest weights: April 12 kg, May 24 kg, June 48 kg, July 72 kg, August 90 kg and September 66 kg. Produce is counted when weighed for distribution, not when planted.

What we would improve next season

Introduce a covered rest area and a wider path between beds. Record accessibility feedback after each session. Keep the narrative report, public totals and counting definitions together so supporters can check them.
